HOANG HUU THOM

Android Engineer – AAOS · AOSP · Mobile

+84 972 52 4570 · huuthom.it@gmail.com · Ha Noi, Viet Nam

Github · Linkedin · Porfolio

Summary

Android engineer with 4+ years of experience: 1 year on Mobile Application, 2.5 years on Android Automotive (AAOS) for luxury vehicles and currently AOSP-based Android TV / Set-Top Box. Own features end to end, from app layer through framework, AIDL and HAL. Strong in debugging device behavior across layers, performance tuning, and reproducible build environments. Use AI-assisted workflows (Claude Code, subagents, skills) to speed up delivery.

Technical Skills

- **Platform:** AOSP , AAOS, Android TV, Mobile, System Services, AIDL, HAL, SELinux, Soong/Make, Unit Testing.
- **Languages:** Kotlin, Java, SQL
- **UI:** Jetpack Compose, XML, Material 3
- **Architecture:** MVVM/MVI, Clean Architecture, Hilt, Coroutines/Flow, RxJava
- **Data:** Room, SQLite, Firebase, REST/JSON
- **Build & Env:** Docker, Gradle, Jenkins, Linux (Ubuntu), Shell
- **Tools:** Git, Gerrit, ADB, CANoe, Figma, OpenGrok, Jira, Enterprise Architect
- **AI-assisted dev:** Claude Code, subagents, skills, agentic workflows

Professional Experiences

CMC GLOBAL *Jan 2026 – Present*

Android AOSP Engineer - Fulltime

- Own custom Settings, Launcher, SetupWizard components of an AOSP-based STB platform.
- Delivered Live TV, media playback and standby/resume scenarios; root-caused cross-layer issues
- (app <-> framework)
- Know how to setup, run and fix xTS(CTS, STS, VTS, GTS) for firmware before submit to Google.
- Work directly with the customer on requirements, issue triage and releases.

FPT AUTOMOTIVE *Jan 2024 – Jan 2026*

Android Automotive Engineer – Fulltime

- Developed and integrated OEM apps (Emergency) and framework, system and plugin services for the AAOS-based AVN of luxury vehicles - IVI system.
- Implement features based on UI/UX provided - Jetpack Compose (Kotlin).
- Implemented plugin service(extend from CarService) with Java and write AIDL interfaces, SELinux policies and Soong modules, key events, VHAL communicate through CarPropetyManager.
- Testing signal with CANoe – able to debug with CAN message.
- Wrote unit tests(C0: 100% & C2: 95% coverage) and tuned performance.
- Authored HLD/LLD design documents (Enterprise Architect) and presented designs to the customer.

FPT SOFTWARE *August 2023 – Jan 2024*

Android Automotive Developer - Fulltime

- Participate to develop OEM apps(Launcher, Profile) and integrate to IVI system for Korean luxury car.
- Implement feature base on UI/UX provided.
- Optimize performance – LeakCanary, WeakReference.

FPT SOFTWARE *Sep 2022 – July 2023*

Android Mobile Developer - Fulltime

- Built native Android features for Social and Finance products.
- Implement feature end to end using Kotlin/Java, XML, Coroutines, Firebase,...
- Work directly with the customer on requirements, issue triage and releases.

GOOGLE DEVELOPER STUDENT CLUBS *Oct 2023 – May 2024*

Mobile Lead (Academy of Cryptography Techniques) - Remote

- Lead the mobile track: ran Android learning sessions and mentored 5 student developers.

Education & Certifications

- **Academy of Cryptography Techniques** — Software Engineering, GPA 3.1 (2019 – 2024)
- **FPT Software Academy** - Android training (Sep 2022 – Nov 2022)
- Android Certified Application Developer (AND-X01), Android ATC: Link
- Claude Code 101 – Anthropic: Link
- Claude Code in Action — Anthropic: Link
- Java (Basic), HackerRank: Link

Languages

- Vietnamese – Navtive
- English: TOEIC 730 — able to comunicating at work, comfortable reading and writing technical documentations
